

Guidelines for poster and data blitz presentations

Poster presentations

The poster session will be held during the break from 12:35 – 13:30 in Lecture Room 4 (LR4), Ground Floor, Baker Building at the Department of Engineering, Trumpington Street.

Poster boards are vertically orientated with dimensions 1 m wide x 2 m tall. Posters should be in portrait orientation and not exceed these dimensions. As an example, the typical A0 size poster is 0.84 m wide x 1.19 m tall. Please review your poster dimensions before you arrive to ensure that it will fit in the defined space.

Adhesive tape/pins to attach your poster to the board will be available in the poster area.

LR4 will be open to attendees from 09:15 to mount their posters. Presenting authors are encouraged to mount their poster as soon as possible, so that it is displayed throughout the meeting. All posters should be removed at the end of the day.

Data blitz presentations

Data blitz presentations give the opportunity to supplement your printed poster with a short oral presentation summarising your work. The data blitz presentation should capture the essence and salient points of your research, highlighting key results or outcomes.

Poster presenters are encouraged to prepare a maximum of 3 slides in PowerPoint format and provide a 3 min presentation of their work at the end of the relevant oral session. The timing of these presentations will be rigidly adhered to.

Please upload your data blitz presentation to <https://forms.gle/dfEyFFVQqrT5xvrS7> by the end of Tuesday, 21st June 2022.

Poster prizes

There will be prizes for the BEST POSTER and for the BEST DATA BLITZ presentation (£50 each) at the Cambridge Imaging Festival. These are kindly sponsored by the Centre for Mathematical Imaging in Healthcare (CMIH). Prize winners will be announced at the end of the festival.
